Subject: RE: Montana is Planning to Submit 2 Exceptional Event Packages - Resending

Hi Ethan,

There have not been any content changes to the Libby PM2.5 EE demonstration since Kristen provided you initial notification. So, the two documents will have different initial notification dates at EPA, but that is fine.

We have put both documents out for public comment last week.

Regards,

Julie

Subject: [EXTERNAL] RE: Montana is Planning to Submit 2 Exceptional Event Packages - Resending

Hello Julie,

Thank you for the email. I'm sorry for the delayed response, I was out on an extended vacation.

Kristin Martin provided an initial notification for the Libby 2.5 demonstration back on May 24th. I responded to that email on June 5th (and cc'd you), and I believe that response is still accurate. Please let me know if something about that demonstration has changed since the earlier email exchange.

Regarding the state-wide 2018 PM10 EE package, this is a sufficient initial notification. As discussed in the past, we will take no action on those values included in the demonstration that do not have a regulatory significance. We will however review values that have regulatory significance to PM10 redesignation requests (such as Whitefish, Butte, and Thompson Falls). Since all state-wide flagged PM10 values are already included in the 2018 demonstration let's plan to discuss which values may have regulatory significance once it has been through the public review period and we have received it.

Please let me know if you have any questions.

Thank You,

Ethan Brown

Subject: Montana is Planning to Submit 2 Exceptional Event Packages

Hi Jaslyn and Ethan,

Montana has two exceptional event packages we are interested in submitting to EPA following our public review process. One package will be for Libby's 2018 PM2.5 EE's that will be supporting our Libby nonattainment area redesignation. The second will be a state-wide 2018 PM10 EE package.

Can you let me know if this email will serve as sufficient notification to EPA, or if there is anything else Montana needs to do before submitting the packages?

Thanks,

Julie Ackerlund, MSE | Air Quality Planner
